FINANCING OF THE CENTRAL GOVERNMENT IN SEPTEMBER 2026

1. Government debt data

The debt of the central government increased by HUF 7,227.3 billion to HUF 67,767.0 billion by the end of September due to the following reasons:

- **The first increasing factor** is the net forint issuance of HUF 6,039.8 billion, which finances the deficit of the central government budget.
- **The second increasing factor** is the net foreign currency issuance of HUF 2,150.8 billion, which finances the deficit and increased the foreign currency deposit, and also increased the debt of the central government.
- **The third – which had contrary effect than the above mentioned factors –** is the appreciation of the forint that decreased the HUF value of the foreign currency debt by HUF 953.9 billion.
- **The fourth also decreasing factor** is the change of the foreign currency exchange rates and other factors that decreased the mark-to-market deposits placed at GDMA by HUF 9.3 billion.

According to the preliminary data **the domestic and foreign currency debt of the central government** was the following in 2026.

Central government gross debt and debt transactions in 2026

	31.12.2025		Issuance (increase in debt)	Redemption (decrease in debt)	Other changes	Net change	30.09.2026		change

The foreign currency debt of the central government increased by HUF 1,196.9 billion in 2026 and amounted to HUF 19,006.6 billion at the end of September 2026. The share of foreign currency denominated debt within the total debt decreased from 29.4% to 28.0% in 2026.

On 7 January 2026, Hungary's first international bond issuance this year was made in the total amount of EUR 3.0 billion (HUF 1.157.9 billion) by issuing two series with different maturities. One of the two series is a 7-year maturity conventional bond in the amount of EUR 2.0 billion (HUF 771.9 billion) and the other one is a 12-year maturity green bond in the amount of EUR 1.0 billion (HUF 386.0 billion). On March 3, 2026, the USD-denominated bond, maturing on September 26, 2035, was increased by USD 1.2 billion (HUF 382.3 billion) through a private placement in response to investors demand. The second international bond issuance was made on 6 July 2026, with a total amount of EUR 3.0 billion (HUF 1,070.1 billion). The foreign currency bond issue consisted of two series of conventional bond: a 5-year maturity of EUR 1.5 billion (HUF 535.1 billion) and a 10-year maturity of EUR 1.5 billion (HUF 535.1 billion). The amount of foreign currency loan drawdowns increased, while the amount of foreign currency bond repayments reduced the outstanding of foreign currency debt and the appreciation of the exchange rate also contributed to the decline in the share of foreign currency debt.

The forint denominated debt increased by HUF 6,039.8 billion to HUF 48,615.7 billion. The share of HUF-denominated debt reached 71.7% of the total debt, this ratio was 70.3% in December 2025.

The stock of retail securities increased by HUF 816.1 billion since the end of 2025 to HUF 12,542.1 billion at the end of September. The Fixed Hungarian Government Security increased by HUF 1,549.9 billion and amounted to HUF 5,201.7 billion at the end of the month. The Hungarian Government Security Plus (dematerialised and printed MÁP Plusz), together with previously sold MÁP Plusz, increased by HUF 544.5 billion and amounted to HUF 1,692.7 billion. The stock of Bonus Hungarian Government Security decreased in this month by HUF 339.8 billion and amounted to HUF 1,730.8 billion. The portfolio of Premium Hungarian Government Security with a long-term maturity decreased by HUF 1,026.4 billion, thus amounted to HUF 2,683.3 billion.

The volume of non-resident holdings of Hungarian government securities decreased by HUF 94.2 billion to HUF 10,175.9 in September. 98.8% of non-resident holdings was Hungarian Government Bonds, which amounted to HUF 10,054.1 billion. The non-resident holdings of Discount Treasury Bills amounted to HUF 121.8 billion, that represented only 1.2% of total non-resident holdings. The duration of the non-resident stock was 6.8 years at the end of September 2026.

In order to reduce counterparty risk associated with the swap transactions concluded by GDMA, so-called marked-to-market deposits are being placed as collateral covering the net value of the swap positions. Such deposits placed at GDMA are counted as part of the government debt as 'other obligations'. During the first nine months of the year marked-to-market and other deposits decreased by HUF 9.3 billion and reached HUF 144.7 billion (EUR 0.4 billion) at the end of the month.

2. Forint yields

The average bid-to-cover ratio of Discount Treasury bill auctions increased from 2.0 to 2.1. The bid-to-cover ratio of Hungarian Government Bonds auctions decreased from 4.4 to 3.3 in September.

The average yield of the last 3-month Discount Treasury Bill auction in September was 5.16%, 5 basis points lower than in the previous month and the 6-month Treasury bill was 5.16%, 4 basis points lower than at the end of August. The average yield of the last 12-month Discount Treasury Bill auction in September was 5.08%, 7 basis points lower than in the previous month.

The average yield of the latest 3-year Hungarian Government Bond auctions in September was 5.67%, and 35 basis points higher compared to the auction in August. The average yield of the 5-year Hungarian Government Bond auction in September was 5.69%, 31 basis points higher than in August. The average yield of the 10-year Hungarian Government Bond auction in September was 5.86%, 37 basis points higher than in the previous month. The average yield of the 20-year bond auction was 5.92%, higher by 24 basis points compared to the last auction in August.
