FINANCING OF THE CENTRAL GOVERNMENT IN NOVEMBER 2016

1. Government debt data

The debt of the central government increased by HUF 790.2 billion in the January-November period due to the following reasons:

- **The first factor** is the net forint issuance of HUF 2,213.2 billion – including retail government securities issuance – executed in the domestic market, which finances the annual deficit of the central government budget and partly the foreign currency debt maturing this year. The balance of the Treasury Single Account increased by HUF 1,137.2 billion in 2016 as well.
- **The second factor** – which had contrary effect than the above mentioned factor – is the net foreign currency redemption of HUF 1,364.7 billion.
- **The third factor** – which is a decreasing factor – is that the forint appreciated, that decreased the HUF value of the foreign currency debt by HUF 39.7 billion.
- **The fourth one** – which is also a decreasing factor – is the change of the foreign currency exchange rates that decreased the mark-to-market deposits placed at GDMA by HUF 18.6 billion.

According to the preliminary data **the domestic and foreign currency debt of central government** was the following in 2016:
